

# EUROCOPTER AS-350 B3 COLLECTIVE PITCH EXTENSION

## NEW STC CERTIFIED IN SWITZERLAND

The Alpine Helicopters collective pitch extension is a kit to improve the comfort of the pilot for right hand seat vertical reference long line operations. It is the only approved collective extension for the Eurocopter AS 350 B3 in Europe today.

It can be used in conjunction with standard or energy absorbing Eurocopter AS-350 seats.

The pitch extension is Swiss FOCA approved (STC FOCA 67-10-00) and is installed in about 30 minutes. The lever has been developed by pilots for pilots.

Made in Switzerland under strict quality control, the Alpine Helicopters collective pitch extension is essential to any long line operation.

Extensive testing has been performed in order to produce a collective extension that greatly enhances comfort. Due to the exclusive shape, any pilot will have a comfortable grip.
